25X1X REPORT NO.RETURN TO CIA
LIBRARY

1. Late in 1949 Czechoslovakia had the following schedule for production of power:

<u>Year</u>	<u>Production</u> (in billion kwh)
1946	5.56 ✓
1947	6.66 ✓
1948	7.5
1949 (first six months)	4.04 (actual production)
1953	11.5 (projected)

2. Power generation for the years 1947 and 1948 reached the totals shown below. All figures indicate billions of kilowatt hours:

	Bohemia	Total	Slovakia	Total
<u>Year 1947</u>				
Independent Stations	2,433)	4,968	319)	736
Plant-Owned Stations	2,535)		417)	
<u>Year 1948</u>				
Independent Stations	2,939)	6,748	382)	808
Plant-Owned Stations	3,809)		426)	

3. Czechoslovakia has a great many small power plants which no longer meet the constantly increasing power requirements or which are no longer profitable to operate. as a result of

this situation the Five Year Plan calls for the construction of large power plants near the sources of energy. Such plants will be established near areas of consumption only in exceptional cases. *

4. Sources of energy for the production of electricity include brown coal and hard coal deposits in the Bohemian lignite deposits in southern Bohemia, southern Moravia, and Slovakia, and the water power available on the Moldavia River and the Naag River in Slovakia.
5. The Two Year Plan provided 5.4 billion kronen for the construction of large power plants. The annual appropriation for these projects under the Five-Year Plan is about 3 billion kronen. **

25X1A

* Comment. See Annex for sketch showing location of Czechoslovakian power plants in 1946.
